SUPPLEMENTAL EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sharon Fenick on May 12, 2005 for claim 22, which originally ends with a period. The recent amendment in which claim 22 does not end with a period is a typo mistake. In claim 22, page 9, line 3, please delete “ ; ” and insert “ . ”

Allowable Subject Matter

2. Claims 1-23 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The prior art taken singly or in combination does not teach or suggest, a method for communicating between graphics memory storage elements, among other things, comprising:

recalling each identified address for each graphics memory storage element where said specific data (needed for SIMD instruction) is stored, and using said recalled addresses to retrieve said specific data into another set of graphics memory storage elements wherein one or more of a plurality of channels have been dedicated for data storage (claims 1, 2, 11, 12, and 23).

a frame buffer (claim 21)/ a texture memory (claim 22) for storing each identified address, for each texel/pixel where specific data is stored, and a pixel-to-pixel communicator

Art Unit: 2676

using said stored addresses to retrieve specific data into selected set of pixels (claim 21) or into selected set of texels (claim 22).

The closest prior art, Rich (U.S. Patent No. 5,923,338) teaches an image generation system including a SIMD processing array, comprising transferring texture between a host processor and a video memory, which functions as a frame buffer. Texture values after being converted to map address, are looked up in a texture map storage for processing, and then stored in the frame buffer.

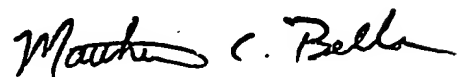

However, reference Rich neither teaches recalling identified address, and using recalled addresses to retrieve specific data into another set of graphics memory storage elements, nor teaches the above mentioned features of the texture memory and frame buffer.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hau H. Nguyen whose telephone number is: 703-305-4104. The examiner can normally be reached on MON-FRI from 8:30-5:30.
